RE: Docket No. NG-0051 / PI 130

Dear Members of the Public Service Commission:

It is a long held position by the Associated General Contractors of Nebraska that infrastructure plays a critical role in our state's economy. This proposed pipeline is one example of the infrastructure our state needs to promote economic development opportunities for Nebraska.

We would ask that you support this pipeline project as an opportunity to improve our infrastructure and enhance economic development.

Sincerely,

Curt Beck
Executive Director
